

Municipal Division in Finland

Municipal Division is a data set depicting the municipal division in the whole of Finland. It is compiled by the National Land Survey once a year and it is available in vector format and in raster format.

The dataset Municipal Division is available in scales 1:10 000, 1:100 000, 1:250 000, 1:1 000 000 and 1:4 500 000. The data included in the data set in scale 1:10 000 are taken from the cadastral registry without generalising

municipal boundaries. Regarding other scales, municipal boundaries have been generalised to suit the scale in question. In addition the data set contains the necessary information to create the divisions according to regions and the State Administrative Agencies in the corresponding scales.

The dataset Municipal Division is available as different products in vector format that are dispatched as separate files. The products in vector format contain the number codes of the municipalities, the names of the municipalities both in Finnish and in Swedish as well as municipal boundaries and municipal regions. In addition the product includes the corresponding information about the county regions and the State Administrative Agencies.

Municipal Division is available via the service interface.

The product is a part of the open data of the National Land Survey of Finland. More information: Acquisition of open data <http://www.maanmittauslaitos.fi/en/opendata/acquisition>.

Purpose:

The product Municipal Division can be used as a background material, in different kinds of analyses and as a starting material for map products.

Geographic location:

Entire Finland

Responsible party:

National Land Survey

Scale:

1:10000, 100000, 250000, 1000000, 4500000

Spatial representation:

Vector and raster

Data content:

The information product specifications for the Municipal Division products in vector format (in

Finnish):<http://xml.nls.fi/Kuntajako/Asiakasdokumentaatio/Tietotuoteselosteet/> and

the scheme document (in

Finnish/English):http://xml.nls.fi/Kuntajako/Asiakasdokumentaatio/Skeemakuvaus/NLSF_AU_schema_documentati

The information product specifications for the Municipal Division products in raster format (in

Finnish):<http://xml.nls.fi/Kuntajako/Asiakasdokumentaatio/Tietotuoteselosteet/>.

Maintenance:

New Municipal Division products are produced in the beginning of the calendar year after updating the dataset Municipal Division.

Quality information

Lineage:

Municipal Division is a data set depicting the municipal division in entire Finland, and it is compiled by the National Land Survey. The Municipal Division data set has been used for making the product Municipal Division 1:10 000. The data set Municipal Division 1:100 000 has been derived and generalised from the ungeneralised municipal division data that originates from the real estate boundary data in the cadastral registry. The generalised data set Municipal Division 1:250 000 is based on the generalised data set Municipal Division 1:100 000. The data set Municipal Division 1:1 000 000 has been generalised from the data set Municipal Division 1:250 000 and the data set Municipal Division 1: 4 500 000 has been generalised from the data set 1:1 000 000. The products that have been derived from these data sets correspond to the scheme of the INSPIRE administrative units.

The real estate boundary data of the cadastral registry that are kept up-to-date continuously serve as the source data set for municipal boundaries. The data concerning changes in municipal boundaries are transferred to the municipal boundaries data set in the beginning of each year.

The Municipal Division products include municipal enclaves if they are suitable to be used in the scale that is recommended for the product. The municipal division regions of the products contain information on whether the region in question is a main region or an enclave. Based on this information, the enclaves can be removed.

The data set Municipal Division does not contain shore lines; they have to be acquired from some other data set that has the corresponding scale.

Conformity:

COMMISSION REGULATION (EU) No 1089/2010 of 23 November 2010 implementing Directive 2007/2/EC of the European Parliament and of the Council as regards interoperability of spatial data sets and services 2010-12-08, 2010-12-08, 2010-12-08 2010-12-08 The data set is in accordance with the information product specification, The conformity has not been assessed. true

Distribution and further information

Distributor:	National Land Survey, customerservice@nls.fi
Conditions applying to access and use:	The product belongs to the open data of the National Land Survey. Open data license: http://www.maanmittauslaitos.fi/en/en/national-land-survey-open-data-cc-40-licence . More information: Acquisition of open data http://www.maanmittauslaitos.fi/en/opendata/acquisition . The data set Municipal Division is produced in scales 1:10 000, 1:100 000, 1:250 000, 1:1 000 000 and 1:4 500 000. The data set is available in vector and raster format products that are dispatched as separate files. Municipal Division in raster format is also available via the Web Map Service (WMTS) http://www.maanmittauslaitos.fi/aineistot-palvelut/rajapintapalvelut/karttakuvapalvelu-wmts (in Finnish).
Limitations on access:	The copyright and the other immaterial rights on the dataset Municipal Division are owned by the National Land Survey. The product is maintained by using data from the municipalities. The data material is not confidential. Public access to the material is not restricted by the INSPIRE Directive.
