\item Its secret is programmability: a host of prewritten template packages
handle almost any formatting task, and you can define your own with
the built-in styling language. You only have to say once how any item
appears, and all further examples then follow your pattern, giving it
unrivalled consistency--- the key to professional-looking
typesetting.

\end{itemize}

Let this leaflet convince you, then get in touch with your nearest
supplier or the contact for your local User Group (see address in
panel). They will be happy to discuss your requirements. You're also
very welcome to come to any of the User Group events and meet other
users.
